Education

2019-22

Bachelor of Computer Application(BCA) Sri Ramakrishna college, Mangalore

Skills

Other programming skills:

Node, Php, MongoDb, MySql

Language

- **English**
- Hindi
- Malayalam

Summary

As a self-taught front-end web developer with a BCA degree, I am deeply passionate about creating visually stunning and user-friendly websites. With a solid foundation in HTML, CSS, and JavaScript, I thrive on turning creative concepts into functional and intuitive designs. I have acquired my coding skills through a combination of Research, YouTube tutorials and active learning on websites dedicated to coding. Additionally, I have gained valuable hands-on experience by working on various projects. I've posted them on My GitHub. I invite you to explore my GitHub repository through the link provided on contact info.

Projects

Personal Portfolio Website

The personal portfolio website project is a showcase of my skills, experience and projects as a front-end web developer.

Technologies i've used:

HTML, CSS, JavaScript, Bootstrap, Typed.js library, AOS library, Github

https://ashmit-cpu.github.io/Portfolio-website/

Apple Clone Website

The Apple Clone Website project aims to replicate the design and layout of the official Apple website. It serves as a demonstration of my front-end web development skills

Technologies i've used:

HTML, CSS, JavaScript, Flickity Library, GitHub

https://ashmit-cpu.github.io/Apple-website-clone/

Spotify Clone Website

The Spotify Clone Website project replicates the captivating design and layout of the official Spotify website, ensuring a visually appealing mobile view as well.

Technologies i've used:

HTML, CSS, JavaScript, GitHub

https://ashmit-cpu.github.io/Spotify-clone/

NetFlix Clone Website

The Netflix Clone project, built with REACT and TMDb REST API integration, provides a hands-on learning experience to explore REACT functionalities and incorporate external APIs like TMDb into applications.

<u>Technologies i've used:</u>

JSX ,REACT, CSS ,JavaScript, TMDb, NPM Modules, GitHub.

https://ashmit-cpu.github.io/NetFlix-clone-REACT/

To-do List

I created a to-do list app using HTML, CSS, and JavaScript, enabling users to create, update, and delete tasks easily while staying organized.

Technologies i've used:

HTML,CSS, JavaScript.
